Check and Record Everyday

You have received this booklet of important health information because you traveled from a country with an outbreak of COVID-19. COVID-19 is a respiratory illness caused by a virus that can spread from person to person.

If you have returned from a country where quarantine orders are required such as Hubei Province China, you will be monitored by the public health department in your destination state. Monitoring will include agreements or legal orders such as a quarantine order.

Under these agreements or quarantine orders:

- You must stay at your home, or at a location chosen by your state or local health department or the U.S. government for a 14-day period from the time.
- Follow the directions in the quarantine order and the directions provided by your health department and the U.S. government.

If you have returned from a country with widespread transmission of COVID-19, stay home and self-monitor for 14 days from the time you left the country. Take these steps to monitor your health:

- 1.** Take your temperature with a thermometer two times a day and watch for cough or difficulty breathing (see instructions in this booklet).
- 2.** Stay home from school.
- 3.** Do not take public transportation, taxis, or ride-shares.
- 4.** Avoid crowded places (such as shopping centers and movie theaters) and limit your activities in public.
- 5.** Keep your distance from others (about 6 feet or 2 meters).
- 6.** If you get sick with fever, cough, or trouble breathing, follow instructions on page 3.
- 7.** If you need to seek medical care for other reasons, such as dialysis, call ahead to your doctor and tell them about your recent travel.

Your health department may have specific instructions for you to follow that may be more restrictive than described above.

Connect with your health department upon return from travel (phone list included in this booklet). They will let you know:

- If you should report your health checks to the health department
- How often you should report your health checks
- Who to contact if you get sick with symptoms of fever, cough, or trouble breathing
- What else you should do if you develop symptoms
- Who to contact if you have questions

Check available hours when contacting your local health department. When you connect with the health department, ask them for the following contact information. Keep track of this important information by writing it below.

The contact information for staff at the health department is:

Name(s):

Phone Number:

After-hours phone number:

Email or website:

Other method:

Use the space below to write important information given to you.

Do I report my health checks?

How often should I report my health checks?

If I get sick, what does the health department want me to do?

Who do I contact if I have additional questions?

Check Your Health and Record Every Day

If you have been exposed to a person with COVID-19, it may take up to 14 days to know if you will get sick. It is important to check your health two times each day for 14 days after you leave. Follow the steps below to check and record your health.

Step 1 Do health checks every morning and every night:

- Take your temperature and/or that of family members who traveled with you and cannot do so themselves.
- In addition to fever, be alert for any other symptoms of COVID-19, including cough or difficulty breathing.
- Write your temperature and any symptoms in the log included in this booklet.
- Write family members' temperatures and symptoms in their own booklets.

Family members who did not travel with you do not need to be monitored.

Step 2 If your health department asks you to report your temperature and any symptoms, follow their instructions.

Step 3 If you have fever (fever is 100.4°F/38°C or higher), cough, or trouble breathing:

1. Do not go out in public.
2. Call the phone number listed for your health department in this booklet. Remind them that you are self-monitoring. Check available hours when contacting your local health department.
3. If you can't reach your health department, seek medical advice – call ahead before you go to a doctor's office or emergency room. Tell them about your recent travel, your symptoms, and guidance received from the health department.
4. Avoid contact with others.
5. Do not travel while sick.
6. Cover your mouth and nose with a tissue or your sleeve (not your hands) when coughing or sneezing.
7. Wash hands often with soap and water for at least 20 seconds to avoid spreading the virus to others.
8. Wash your hands with soap and water immediately after coughing, sneezing, or blowing your nose. If soap and water are not readily available, you can use an alcohol-based hand sanitizer that contains 60%-95% alcohol. Always wash hands with soap and water if hands are visibly dirty.

Before you take your temperature:

Wait 30 minutes after eating, drinking, or exercising.

Wait at least 6 hours after taking medicines that can lower your temperature, like:

- Acetaminophen, also called paracetamol
- Ibuprofen
- Aspirin

How to Take Your Temperature

1. Turn the thermometer on by pressing the button near the screen.

2. Hold the tip of the thermometer under your tongue until it beeps. Do not bite the thermometer.

3. Read your temperature on the screen. If your temperature is 100.4°F/38°C or higher, you have a fever.

4. Write your temperature in the 14-Day Symptom and Temperature Log in this booklet.

5. Clean your thermometer with soap and water and dry it well.

PLEASE NOTE: For infants and children younger than 4 years old, use an age-appropriate thermometer such as an ear thermometer. If you do not have one, use a regular thermometer by placing it under the child's arm in the center of the armpit.

For the armpit method, if the child's temperature is 99.4°F/37.4°C or higher, they have a fever. Tell the public health worker that you are taking the child's temperature this way.

Two times a day (morning and night), write down your temperature and any COVID-19 symptoms you may have: feeling feverish, coughing, or difficulty breathing. Do this every day for 14 days.

1. Fill in the dates on the log, starting with Day 0 and ending with Day 14. Day 0 is the day you left the country with an outbreak of COVID-19.
2. Start recording your temperature and symptoms, beginning with today's date.
Fever is 100.4°F/38°C or higher.
3. If you get sick, contact your health department. Be sure to tell them that you traveled from a country with an outbreak of COVID-19, your symptoms, and that you are selfmonitoring.
4. Your daily health checks are complete 14 days after the day you left the country with an outbreak of COVID-19, or as indicated by public health authorities.

DAY	DATE	SYMPTOMS	TEMP
DAY 0	Feb 1, 2020	Day 0 is the day you left the country with an outbreak of COVID-19.	
DAY 1	Feb 2, 2020	 No Symptoms	97.4 F
		 No Symptoms	98.6 F
DAY 2	Feb 3, 2020	 No Symptoms	96.9 F
		 No Symptoms	98.6 F
DAY 3	Feb 4, 2020	 No Symptoms	98.0 F
		 No Symptoms	98.6 F
DAY 4	Feb 5, 2020	 No Symptoms	97.3 F
		 No Symptoms	98.6 F
DAY 5	Feb 6, 2020	 No Symptoms	96.5 F
		 No Symptoms	98.6 F

Symptom and Temperature Log

Write your symptoms and temperature in the space below every day for 14 days.

DAY	DATE	SYMPTOMS	TEMP
DAY 0		Day 0 is the day you left the country with an outbreak of COVID-19.	
DAY 1		 	
DAY 2		 	
DAY 3		 	
DAY 4		 	
DAY 5		 	
DAY 6		 	
DAY 7		 	
DAY 8		 	
DAY 9		 	
DAY 10		 	
DAY 11		 	
DAY 12		 	
DAY 13		 	
DAY 14		 	

If you get sick, contact your health department as instructed and remind them you traveled from a country with an outbreak of COVID-19, your symptoms, and that you are self-monitoring. Your daily health checks are complete at 14 days, or as indicated by public health authorities.

If you have a medical emergency, call 911. Tell them you've traveled from a country with an outbreak of COVID-19.

This is a list of telephone numbers for health departments across the United States that travelers can use to connect with the health department in their destination state or the state they are in. These phone lines are monitored at all times, and travelers may call 24 hours a day and 7 days a week unless noted. Members of the public with general questions about COVID-19 should call their state health department's main daytime telephone number or they can contact CDC at www.cdc.gov/cdc-info or 1-800-CDC-INFO (800-232-4636) or TTY 888-232-6348.

State	Phone Number
Alabama	1-800-338-8374
